Cable Management / Vertical With Cover
Vertical Cable Manager for 19-inch Network Racks & Cabinets

Part Number: PL-CM12V

Product Description:

Vertical metal cable management channel with protective front cover, developed for organized routing of copper and fiber patch cords along the rack or cabinet frame. The 1.2 mm steel base provides a rigid mounting structure, while the covered vertical layout helps conceal and protect cable bundles and keeps the rack front neat and serviceable. Designed for standard 19-inch network racks and cabinets with straightforward installation and removal.

Technical Specifications:

Parameter	Specification	Parameter	Specification
Product Type	Vertical cable management with cover	**Rack Compatibility**	Standard 19-inch racks & cabinets
Part Number	PL-CM12V	**Mounting Orientation**	Vertical
Base Material	Steel construction	**Base Thickness**	1.2 mm
Cover	Protective front cover	**Installation**	Easy to install and uninstall
Cable Routing	Vertical pathway for patch cords / jumpers	**Primary Application**	Copper & fiber cable organization
Finish / Color	Recommended: black powder-coated finish	**Edge Treatment**	Recommended: smooth, deburred edges
Cable Access	Recommended: front access with cover removed	**Mounting Location**	Rack/cabinet vertical frame area
Product Category	Passive rack accessory	**Design Objective**	Organized, protected vertical cable routing

Applications & Key Benefits:

•Suitable for vertical patch-cord routing in structured-cabling racks and network cabinets.
•Covered design conceals and protects cable bundles while maintaining a clean professional rack appearance.
•Supports organized copper and fiber patch-cord routing and easier moves, adds and changes.

Compliance
RoHS Compliant
